

Low cost Multi-drop IP for Industrial Control and Automation Applications

Remote Access and Control via Internet or company IP network

Linking IP enabled Equipment

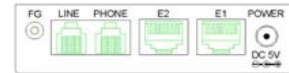

Local Control Centre

Power Control and Switching

Programmable Controllers for equipment control and alarm monitoring

Gateway for serial data devices

ABST (CARI) Modem

Single copper pair cable up to 1.5 km with up to 20 drops

The Netsys NH300EP provides a low cost means of linking a wide range of IP based industrial control and automation equipment over existing copper cables such as internal telephone cables. With it's multi-drop capability it is the IP equivalent of the traditional RS-485 serial data driver
